Washington Recorder.

One would think that the emphatic repudiation of free trade by the voters in 1891, and the reiteration of the repudiation on November 3 last would be sufficient to cause the free trade to perceive that free trade is a back number, and that protection is the policy of the future. But the free traders go placitly on, laying plans for the policy of the administration of President McKinley, suggesting of a tax on teax on beer, the largest of a tax on teax on beer, the largest of a tax on the superficient for the exception of a tax on the superficient for the exception of a tax on the superficient for the exception of a tax on the superficient for the exception of a tax on the superficient for the exception of a tax on the superficient for the exception of a tax on the superficient for the exception of the following the superficient for the exception of a tax on the superficient for the exception of a tax on the superficient for the exception of the following the follo

out of work, and wages decreased from one end of the country to the other. We have a deficit in the treasury instead of a surplus, It is time, surely, to call a half and to right about face toward protection, prosperity and a surplus that will decrease the Democratic gift of debt.

The prosperity of the laboring people, the payment of high wages—these are alite the cause and the result of protection. Because the wages of American laborers are higher than the wages of Europe, we need protection against that labor with its low wages. If American wages were cut down to the foreign laborers—so long as they were able to keep body and soul together at those pauper wages. But it is in order that they may never have to meet such conditions that a protective tariff is imposed on the products of those who do labor under such conditions. By such protection, the high rate of American wages is maintained, and thus the high wages which were, in the beginning, incause of the imposition of a protective tariff, are also the result of the maintenance of protection.

### GROWING GREENWOOD.

Brings Individual Thrift, and Nominations for Council-Dime Readiug-Lecture-Burglary-Visitors-

Greenwood, S. C., April 10, 1897.
The citizens of the various wards of our city met in their different wards on Thursday night and nominated the following aldermen for the coming council: T. F. Riley, J. T. Simmons, J. T. Kellar, A. McD. Singleton, W. G. Gambrell and Abney Jones of the wards endorsed Mr. D. C. DuPre, as Mayor, who so far is the only candidate for that position.

wards endorsed Mr. D. C. Durre, as mayor, who so far is the only candidate for that position.

The ladies of the Baptist church gave a dime reading at the house of Mr. J. K. Durst on Friday evening. Quite a number assembled to hear the participants and were dedelighted with the rendition of the program. With the talent that is in Greenwood for reciting, etc., there is no reason why all such entertainment should not be the last dime reading, but others should follow.

Hon. W. P. Wideman delivered last Tuesday evening in Bailey & Barksdale's Hall his lecture on "Hit the Git." He was greeted by a fairly good house, and those present were pleased with his lecture. We understand Mr. Wideman proposes to remain on the lecture platform, and his Greenwood friends wish him success.

A few nights ago Ford's store was broken open by burglars, and the shelves and show cases relieved of canned goods and candies. A supply of tobacco was also laid by and carried away. Of course, steps were taken

Of course, steps were taken to catch the man and as a consequence he is now stopping with Sheriff Nance. The burglary was a bold one, the front door having been broken open, and the store being on the square—but it was a dark night and Greenwood is without lights by which theeves and burglars together with other law-breakers may be detected. burgiars together with other law-breakers may be detected.

### M'LAURIN'S POSITION ENDORSED.

Letters Are Pouring in Endorsing

His Recent Speech. To the Editor of The Spartanburg Heraid.

I have noticed your kind comments upon my recent speech on the tariff bill and desire to express my thanks for them. I have received a great many letters from people in every part of South Carolina endorsing the position I have taken and saying they are with me in that fight. I enclose a copy of one of the best of those letters, from a prominent gentleman of Laurens county, and will be pleased if you will kindly publish it in your paper. I have obtained Mr. Smith's permission to make the letter public and have also forwarded copies to the State and the News and Courier. Thanking you in advance, I am,

Juo. L. McLaurin.

Lisbon, Laurens Co., S. C., April 2.
Hon. John L. McLaurin:
Dear Sir: I hope you will excuse me for intruding on your time, but I have just finished to commend you for the stand you have taken. The southern members should have taken that position long ago then, perhaps, we might a position long ago then, perhaps, we might have been in a better condition financially to day. At least, we would have the satisfaction of knowing that we had stood up manfully for our rights and not tamely submitted to every demand that the north has exacted of us. Your speech is the ablest exposition of the lifernal deviltry (if you will pardon such an expression) and the canting hypocrisy of the descendents of the Mayflower pilgrims that it has every been my pleasure to read. It should be read by every man, woman and child in the Southern States. It should be read by every man, woman and child in the Southern States. It should be read by every man, woman and child in the Southern States. It should be read by every man, woman and child in the Southern States. It should be scattered all over the United States. It will be one of the best campaign documents that could be asked for. It will be one of the best campaign documents that could be asked for. If it does not open the eyes of every southern farmer as to the manner in which they are being fleeced to enrich the North expressed great sympathy for France when Germany took Alsace and Lorraine and demanded two billion franks ass a war indemnity; but when it comes home, she has no sympathy for the South. After the Alexandra of the South. After the Alexandra of the South After the South After the Alexandra of the South After the Alexandra o

for France when Germany took Alsace and Lorraine and demanded two billion franks as a war indemnity; but when it comes home, she has no sympathy for the South. After destroying the South's property, the North has forced her to pay as pensions to the northern soldiers a far greater burden to the impoverished South than that imposed on France; and added to that is the tribute she has exacted of us under the guise of protection. While the Southern members of Congress foolishly demand free raw material, the Northern fellows, with an eye to business, helped to secure their wish; at the same time, knowing where the profits were, they got the manufactured article protected.

By placing everything the South produced on the free list, they have been able to import the raw material free, or force the Southern producers to accept their prices for Southern producers. They then manufacture the raw material, purchased at free trade prices, and sell back to the producers at protection prices. No other people or country but Southern people and the South, placed in the condition they were by the war, could have survived such a drain. It is time for us to call a halt, and your speech is a timely notice that the new South intends to make a departure from old customs and will no longer quietly submit to the unjust exactions of New England, but will demand equal rights to all and special privileges to no one section of the Union.

Not being one of your constituents, I feel a delicacy in addressing you, but being a South Carolinian and in full sympathy with you in

delicacy in addressing you, but being a South Carolinian and in full sympathy with you in this, is the only excuse I have to ofter. Yours Alex J. Smith.

WILL DO IT.

We don't expect any man to buy here who can do better anywhere else, but he'll have a fruitless hunt. We pun our whole heart intoclothes—buying and seiling. We employ every talent, profit by experience, strive for every perfection, and have got the art down to a nicety. While some are shouting how cheap they've got, we want to tell you how cheap they've got, we want to tell you how cheap they've got, anybody can sell common clothes—there's no knack about that. We've got suits as low as \$4—all wool and will give you satisfaction, but our better class of goods, where expertness counts, eleverness is taxed, where competition is declared out of the race, where its "neck and neck" with the best of custom talloring, and we are selling that class of goods at actual cost now to make room for spring stock. And just think of what a saving it is. A little more than is asked for the cheap truck, but a great deal less than the tailors demand—about half. What worth have words when everybody claims the largest stock? What weight have published prices unless you can prove the values? You've got a standing invitation to look us over and see if we are not showing three times the variety of suits that is to be found anywhere else. You are assured satisfaction in every purchase, not the "as good as-kind," but a guarantee that there can be no better made. There's no chance of our not being able to suit you. Such an immense line must hold everybody's size and everybody's style. Some of the "back-clothiers" advertise clothing in any shape as the fashionable sort, but their idea is like their clothes—ancient. The styles this season are of the moderate sort in length, both cutaways and sacks. This way for the correct style at lowest prices that can be made for the best clothes.
